

## QUALIFIED PRODUCTS LIST FOR BOOKCASE, WOOD, OFFICE

(This Qualified Products List is released for procurement purposes until revised or rescinded.)

### SCOPE

#### General

The furniture detailed in this Qualified Products List is intended to cover various types of bookcase for use in offices. Acceptance and listing implies that the manufacturer will maintain the necessary quality control to ensure deliveries will be made no less in quality than the evaluated furniture.

This Qualified Products List is for the use of all state agencies and the public schools in the procurement of the products covered. Use for any other purpose is not intended, and use for promotional purposes is specifically prohibited.

This qualified products list is not intended to include all varieties of the commodity as indicated by the title of this list, or which may be commercially available, but is intended to cover only those commonly used by State Agencies and the public schools. Listing of a product is not intended to and does not connote endorsement of the product by the state.

#### Manufacturer's changes in specifications:

Any changes in specifications of the listed items shall be reported to this office in writing within five (5) working days after the change is implemented. The acceptability or lack thereof of the revised product will be made at the sole determination of the State. Failure to properly report changes in specifications in accordance with the above may result in removal of the item from this list.

#### Manufacturer's change in product identifier only:

Any change in the product identifier of a listed item, where no change in manufacturer's specifications has occurred, shall be reported to this office in writing within five (5) working days after the change is implemented. The State reserves the right to investigate the circumstances and to subsequently accept or reject the re-identified product, whichever the State in its sole judgment deems appropriate. Failure of bidder to properly report changes in product identification in accordance with the above may result in removal of the item from this list.

#### Discrepancies in product identifiers:

In instances where the manufacturer's product identifier and the identifier listed in the QPL differ, the State reserves the right to investigate the circumstances and to subsequently accept or reject the product in question, whichever the State in its sole judgment deems appropriate.

### QUALIFICATION

## **Application**

An application for addition of products to this qualified products list must be made in writing to the Standards section, Division of Purchase and Contract, 116 West Jones St. Raleigh, N.C. 27603-8002 at least 120 days before the original expiration date of the current term contract.

## **APPLICABLE STANDARDS**

### **Specification**

The design requirements for the products listed herein are detailed in Specification 7195-7 (latest dated revision). This Qualified Products List will be used as the sole approval source for products covered by the Invitation for Bid (IFB).

## **CLASSIFICATION**

### **Definitions of Classification**

The bookcases covered by this specification are defined by the 'Type' of design, Style of the base and top, and Class of the materials used in the manufacture.

**Type** defines the construction / design of the unit. There are two types, I & II

**Type I** is the typical case design with the sides, top, bottom and back panel attached to each other as a single unit. A separate base and top boxed structure is then attached to the case.

**Type II** is the design with the end panels extending to the floor with rails attached to them front and back. The rails also provide support for the bottom shelf.

**Style** defines the configuration of the base. There are two styles, A & B.

Style A is a recessed base having a base structure that is recessed approximately 3/4" inch behind the front face of the shelving.

Style B is a Traditional base having a base structure that is flush or extends approximately 3/4" inch beyond the front face of the shelving. Trim beading may be used to "soften" the interface between the case and the front top of the base.

**Class** defines the materials of construction. There are three classes, 1, 2, and 3

**Type I, Class 1** shall have the case manufactured from either solid wood, multiple ply plywood (veneer core), or 3-ply lumber core plywood.

**Type II, Class 1** shall have the end panels and top manufactured from either solid wood, multiple ply plywood (veneer core), or 3-ply lumber core plywood.

**Type I & II, Class 2** shall be manufactured from either particleboard or fiberboard surface finished with matched wood veneer. The construction may include standard wood joints, cleats, mechanical locks, or metal plates / brackets. End panels shall be 7/8" inch (Maximum) thick

**Type I & II, Class 2H** shall be same as Class 2 but end panels shall be 1"inch (Minimum) thick.

**Type I & II, Class 3** shall be manufactured from either particleboard or fiberboard surface finished with 0.028 inch thick (minimum) high pressure laminate or low pressure laminate. The construction may include standard wood joints, cleats, mechanical locks, or metal plates / brackets.

**Classification**

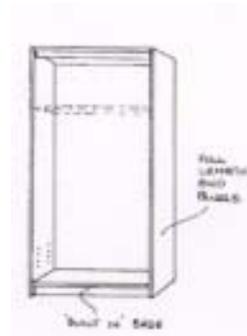

***Types***

**Type I**, Case design

**Type II**, End panel design

**Type I**

**Type II**

***Styles***

**Style A**, Recessed base.

**Style B**, Traditional base.

***Classes***

**Class 1**, Solid Wood

**Class 2**, Particleboard with wood surface veneer. 7/8"(max) end panel thickness.

**Class 2H**, Particleboard with wood surface veneer. 1"(min) end panel thickness.

**Class 3**, Particleboard with high-pressure laminate or low-pressure laminate.

**Identification**

Type, Style and Class shall identify the bookcases defined above. For example: **Type I, Style 2, Class1** represents a solid wood case design with a traditional base.
